Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: Embodiments I-II and the First grouping elements A-C define the Species.

Applicant must choose a Species from Embodiments I-II:

-Embodiment I: method for forming a contact or via plug where the liner layers consist of PECVD material (¶¶9, 18, 22, 25; fig. 1).

-Embodiment II: method for forming a contact or via plug where the liner layers do not consist of PECVD material (¶¶10, 30; fig. 2)

First Grouping:

If applicant chooses Embodiment II, applicant must choose from the elements A-C:

A, First liner layer (¶34)

1. Silicon nitride
2. Metal

B, Second liner layer (¶36)

1. Silicon nitride
2. Metal

C, Formation of contact or via plug

1. Two-step etching (¶¶ 40-42)
2. Three-step etching (¶¶ 40-42)
3. Three-plus+ step etching (¶¶ 40-42)

4. Directly fill third opening with conductive material without removing first and second liner (¶¶38-39)

Applicant is required to pick one embodiment from embodiment I-II. Then, applicant is required to pick one embodiment from first grouping A-C if applicant elects embodiment II. For example, one embodiment of Embodiment II-A1B1C1 would be forming a contact or via plug where the liner layers do not consist of PECVD material, where the first and second liner layers are Silicon nitride, and with a two-step etching process to form a contact or via plug.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2829

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Belinda Lee on 1/9/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
